SUMMARY

Flutter Developer | Full-Stack Mobile Solutions

Flutter Developer with 1+ years of production experience building scalable, high-traffic mobile applications using Clean Architecture and Bloc/Cubit state management. Led the rebuild of Marah World, a children's video streaming platform serving 1M+ families across the Middle East with 99.9% crash-free stability. Skilled in REST API integration, Firebase, Supabase, and payment gateway integration (Stripe, PayPal, Paymob, hyperpay). Currently expanding into backend development (Node.js, NestJS, PostgreSQL) to deliver full-stack mobile solutions.

EDUCATION

Bachelor's in Computer Engineering

Dec 2020 - May 2025

Faculty of Engineering, Shoubra – Benha University

GPA: 3.5/4.0 (Very Good with Honors – 83%)

Thesis: AI-Powered Shark Detection System (Awarded Top Project in Department)

Relevant Coursework: Software Engineering, AI & Machine Learning, Mobile Computing, Database Systems

TECHNICAL SKILLS

- Programming Languages: Dart, JavaScript, C++, Java
- Frameworks & Architecture: Flutter, Node.js, Bloc, Cubit, Provider, MVC, MVVM, Clean Architecture
- Backend & Databases: Firebase, Supabase, MySQL, SQLite, Hive, Shared Preferences
- APIs & Integrations: RESTful APIs, Stripe, PayPal, Paymob, hyperpay, third-party SDKs
- Tools & Platforms: Git, GitHub, Postman, VS Code, Flavours
- UI/UX & App Development: Responsive UI, Localisation, Debugging, Deployment, UI/UX best practices
- CI/CD Pipelines: TestFlight, App Store, Google Play

PROFESSIONAL EXPERIENCE

Flutter Developer | Pan Arab Media (Remotly)

SEP 2025 - Present

- Led the architecture and rebuild of Marah World, a children's edutainment and video streaming platform serving 1M+ families across the Middle East with high-concurrency video and interactive content.
- Resolved critical bugs and performance bottlenecks, achieving and maintaining a 99.9% crash-free rate in production.
- Implemented scalable state management using Bloc/Cubit, reducing code redundancy by 30% and improving development velocity.

Flutter Developer | LeapTech Kw (Full Time)

SEP 2025 - May 2026

- Developed Leap+, an internal employee engagement app, using Clean Architecture, Bloc/Cubit, and Supabase for backend services.
- Deployed and published the application to Google Play and the Apple App Store, managing QA and beta testing via TestFlight.

Software Engineer & AI Prompt Engineer | Hive Tech

JUL 2025 - SEP 2025

- Built Elkmash Chat, a real-time internal communication app for HR workflow and employee messaging.
- Designed and optimized LLM prompts to improve AI feature accuracy, consistency, and usability for client applications.
- Collaborated cross-functionally to integrate LLM-powered features into production client applications.

PROJECTS

- **Marah world - عالم مرح**  [App store](#)  [Google play](#)

High-scale Flutter platform for children's video content , **1M+ downloads**, serving families across the Middle East with seamless cross-platform performance.

- **Sahla-سهلة**  [App store](#)  [Google play](#)

Full-featured e-commerce app with seamless browsing, cart management, secure checkout, and order tracking for a smooth online shopping experience.

- **Minwayn - من وين**  [App store](#)  [Google play](#)

Min Wayn is a visual search platform where users help each other find products and earn reward points for contributions.

- **Leap+**  [Google play](#)

LeapTech Plus is the all-in-one internal platform designed to empower employees and foster a connected company culture. We've combined essential work tools with social engagement to help you manage your professional life with ease and transparency.

- **Resupply Ai**  [App store](#)

Develop AI based information platforms to support, motivate, and facilitate all businesses seeking to secure contracts with the US Government

- **ScanTrack(freelancing)**  [App store](#)

A QR-based student attendance tracking app for supervisors. Each student has a unique QR code for quick, accurate scans.

- **Benaya-بناية (google and apple soon)**

Comprehensive real estate management app for property owners and tenants. Manage units, track rent payments, handle maintenance requests, and streamline communication between all parties — whether you own, rent, or both

- **AI-Powered Shark Detection System (Graduation Project with Excellent Grade)**  [link](#)

Real-time shark detection using YOLOv8 on NVIDIA Jetson, with Flutter frontend for live video streaming, buzzer alerts, and Firebase notifications. System achieved 92% detection accuracy in coastal test environments.

Tech: Flutter (Web & Mobile), YOLOv8, Jetson Nano, Firebase, Supabase, flutter_mjpeg

CERTIFICATIONS

Complete Mobile Development Bootcamp (Certificate of Completion – 120 hours)

Feb 2024 – May 2025

- Worked on cross-platform mobile applications using Flutter, focusing on implementing UI designs, integrating RESTful APIs, and managing app state with Cubit. Contributed to debugging, testing, and performance optimisation.

Udemy Courses:

- Flutter for Beginners
- Advanced Flutter – Clean Architecture
- Google Maps Integration in Flutter
- Adaptive and Responsive UI
- Version Control with Git & GitHub
- Flutter Payment Integration (Stripe, PayPal, Paymob)
- Solid Principles with Flutter

ADDITIONAL INFORMATION

Languages

- Arabic: Native
- English: Professional Working Proficiency

About graduation project

- We successfully secured the leading project within the Computer Engineering Department of my faculty.
